

Marble and Stones for Interior Design and Construction

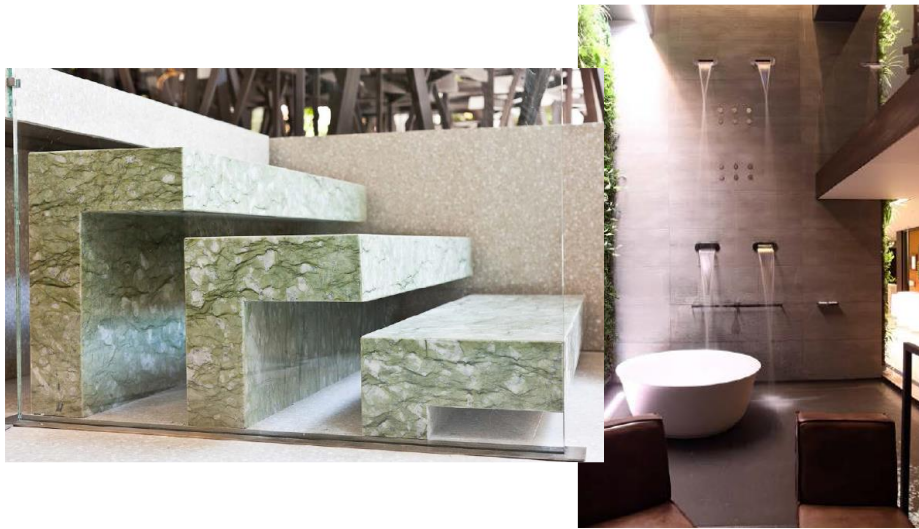

ALIMONTI is constantly searching for new materials and colours all over the world. Nature and time can give us an endless number of shades.

Once “shaped” by man, marble can create wonderful and refined atmospheres in exclusive environments.

Its natural elegance is an inspiration for architects and designers for the creation of works that embrace all architectural styles.

Marble, stones, granite, onyx, semi-precious materials can be forged and combined to create new finishings and new textures that “can be enjoyed with eyes, felt and touched”, capable of producing a strong emotional and stage-like impact, making every project a unique experience.

Rooms and spaces (both internal and external) take on an elegant look thanks to the surfaces worked to create a bright or delicate effect, emphasizing harmonious facets and shades.
