

Ceramics, from a simple cladding to a bespoke interior design project

A unique Italian industrial reality which has been producing majolica tiles since 1968 with the same technique used in Faenza.

Ceramics are designed and made with passion and care by people who love their work.

We believe in the quality of raw materials, in the strength of colour, in the depth of glazes and in Made in Italy. We preserve tradition and craftsmanship that provide an extraordinary value to every industrial process.

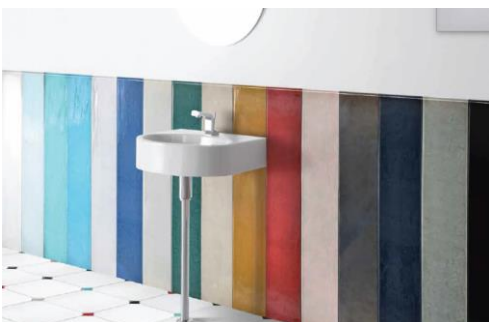

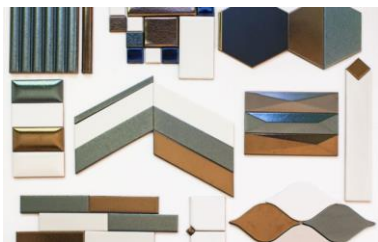

Our glazes are the result of a continuous lab research.

The effects obtained on the surfaces are unlimited: materic, crackle, antiqued, lacquered, transparent, silk, metallic, glossy...

We are versatile and we like to meet the demands of our customers, architects, designers, who are increasingly turning to us to develop custom-made tile lines.

Our handcraft approach to work allows us to fulfill every request by providing even small quantities.

Our motto is: choose a size, choose a colour ... we'll make it!
