Marble and Stones for Interior Design and Construction

ALIMONTI is constantly searching for new materials and colours all over the world. Nature and time can give us an endless number of shades.

Once “shaped” by man, marble can create wonderful and refined atmospheres in exclusive environments.

Its natural elegance is an inspiration for architects and designers for the creation of works that embrace all architectural styles.

Marble, stones, granite, onyx, semi-precious materials can be forged and combined to create new finishings and new textures that “can be enjoyed with eyes, felt and touched”, capable of producing a strong emotional and stage-like impact, making every project a unique experience.

Rooms and spaces (both internal and external) take on an elegant look thanks to the surfaces worked to create a bright or delicate effect, emphasizing harmonious facets and shades.

Ceramics, from a simple cladding to a bespoke interior design project

A unique Italian industrial reality which has been producing majolica tiles since 1968 with the same technique used in Faenza.

Ceramics are designed and made with passion and care by people who love their work.

We believe in the quality of raw materials, in the strength of colour, in the depth of glazes and in Made in Italy. We preserve tradition and craftsmanship that provide an extraordinary value to every industrial process.

Our glazes are the result of a continuous lab research.

The effects obtained on the surfaces are unlimited: materic, crackle, antiqued, lacquered, transparent, silk, metallic, glossy...

We are versatile and we like to meet the demands of our customers, architects, designers, who are increasingly turning to us to develop custom-made tile lines.

Our handcraft approach to work allows us to fulfill every request by providing even small quantities.

Our motto is: choose a size, choose a colour ... we'll make it!

Bespoke Furniture to grant everybody his own Dream Home

From a little workshop of joiners and carpenters to a team of skilled and professional artisans deeply passionate about their job and willing to satisfy all of their clients' needs.

A perfect combination of high quality wood and excellent craftsmanship to create bespoke furniture, designed and manufactured to fulfil all customers' requirements and fill the space with unique pieces.

We are interested in the individual, with his specific needs, his tastes and his desire to distinguish himself. We study - and work - always in terms of people and never by groups or categories.

Whether it is for a little furnishing object or for a big interior project, artisan know-how and cutting-edge technology work together to achieve the best possible result.

Each project is a challenge. The careful selection of materials and the strong attention to details combine with a contemporary taste, in order to balance shape and function as in the best Italian design tradition.

Doors can make Interior Design a Unique Experience for the Senses

Technological research and taste for aesthetics and style can make domestic life a unique experience, based on new combinations of colours, shapes and materials.

With MR Art Design doors become the expression of a new concept where home is a synonym of experimentation, beauty and functionality.

Glass and Crystal combine with different materials like Aluminum and Wood in order to mix transparencies, reflections and colours with strength and reliability. All this makes contemporary living a continuous experience based on architecture and design, without forgetting the comfortable feeling of “being at home”.

Design Security Doors - feeling safe without sacrificing aesthetics

Behind each door there is a unique and unrepeatable story: a family, teens, kids who grow up, timeless emotions and small everyday details. These are the stories that inspire a continuous search for quality and innovation, resulting in a process that combines research, experimentation, art, design, production control.

ALIAS doors ensure excellent performance from anti-burglary efficacy to acoustic insulation. They are tested for 50,000 openings, the equivalent of 30 years of absolute security.

DREAM is the security door specifically designed for interiors and in particular for **bedrooms**. With its unique structure and adaptability, **Dream** can be included in every kind of housing project and adapts to any frame and inner door panels. It can take the shape of any interior door without being intrusive and ensures your safety with absolute discretion.

FLAT COLLECTION is a system created to make each place unique and to give space a new design dimension.

The particular framework of the door profile ensures a **reduction of thermal transmittance** till a value of $1,0 \text{ W/M}^2\text{K}$. A unique product, with an innovative personality and top insulation performances.

MAGMA is the fire rated door structure certified according to EN 1634-1. It is available in different version with fire resistance up to EI₂90.

WING WALL is the only flush to the wall security door, perfectly coplanar to the internal wall. It is also available in EI₂60 fire resistant version.

The innovative **Wing series (WING BOISERIE, WING ALI, WING STORE)** permits to create an infinite number of compositional solutions. The door panel can be extended to a coplanar boiserie, to side moveable wings or to a wardrobe giving an idea of continuity so that the house entrance will acquire a new identity suitable for the most elegant spaces. Wing series perfectly combines beauty and functionality, the safety of a security door mixed with the beauty of real furniture for the home entrance.

New **DEFENDER** gratings have been designed to protect houses combining class 3 certified anti-burglary features with harmony and style. They can be customised with different finishes and technical options to satisfy all Customers' requests.

Ceramic and crystal as part of contemporary living to create strong tactile and visual sensations in the bathroom

Minimal washbasins, WC's and bidets move from classic design to a careful awareness of modern fashion and styles, enlarging the product range to combine a new way of living with functional and modern concept of architectural bathrooms.

Design becomes a concept, it is assimilation and at the same time indifference towards standards and codes.

The original idea is to mix time, tradition, craftsmanship and modernity into one single object, to deconstruct our way of thinking about common shape in search for a final absolute balance.

Those who choose this concept are invited to consider it as a work of art, since it serves its specific function in an avant-garde way, being a slight intellectual transfer from standard bathroom to noble and fashionable set of furnishing elements.

Reinventing tradition to make the bathroom a meeting place for functionality and aesthetics

The expression of craftsmanship and attention to the product, together with the design, define a qualitative and dynamic approach aimed at reworking production systems, forms and functions with an innovative view.

Body care which is usually a shelter from stress and a pleasant time to devote to ourselves becomes more enjoyable and relaxing, through an immersive management of the flows and the support of chromotherapy.

Quality and craftsmanship are the core values of the manufacturing process and all phases of production are followed with careful attention to details. Large parts of the proceedings, such as cleaning, plating and assembly, are performed manually by experienced and qualified staff.

Artisan articles differentiate themselves from big automated and standardized products because it is as if every piece was unique and limited in constant search for perfection.
