Slideart Frameless – Wheel mechanism version

Suitable for all kind of windows and doors materials: aluminium, PVC, wood, stainless steel, brass

Slideart Frameless
More light
More energy performances
More versatility

The first minimal sliding system
with a competitive price
respect to traditional solutions

Slideart Frameless – Wheel mechanism version

Greater smoothness and lightness of sliding movement without frictioning or wearing
All mechanisms are installed on the frame

Slideart Frameless – Wheel mechanism version

Designed with positioning on the upper transom of the frame
Profile thickness can be hidden into the false ceiling or interfloor distance

Slideart Frameless – Wheel mechanism version

- With the door in closed position, the wheel do not carry the whole weight of the sash, avoiding wheel roundness.
- Both rolls are adjustable, to simplify fitting and adjustments
- Available with wheels both on ceiling and floor
